

EXP NO: 3

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

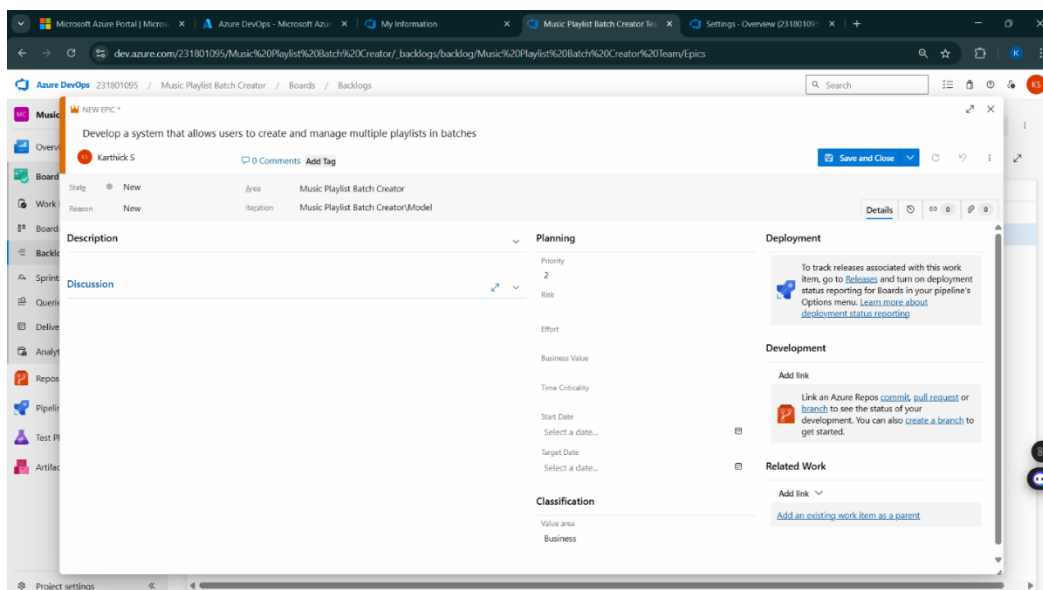

Aim:

To learn about how to create epics, user story, features, backlogs for your assigned project.

Create Epic, Features, User Stories, Task

1.Fill in Epics

2.Fill in Features

The screenshot shows the Azure DevOps interface for a project named "Music Playlist Batch Creator". The left sidebar contains navigation options: Overview, Board, Work Item, Backlog, Sprint, Query, Deliverables, Analytics, Repos, Pipeline, Test Plan, and Artifacts. The main area displays a work item titled "26 Auto-Playlist Creation Based on user preference" by Karthick S. The work item is in the "New" state. The description field is empty, with a placeholder "Click to add Description.". The discussion field is also empty, with a placeholder "Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.". The right sidebar shows the "Details" tab, which includes sections for Planning (Priority 2, Risk, Effort, Business Value, Time Criticality, Start Date, Target Date), Classification (Value area Business), Deployment (To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting), Development (Add link, Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.), and Related Work (Add link, Parent, 25 Develop a system that allows users to creat..., Updated Feb 11, New, Child).

3.Fill in User Story Details

The screenshot shows the Azure DevOps interface for a project named "Music Playlist Batch Creator". The left sidebar contains navigation options: Overview, Board, Work Item, Backlog, Sprint, Query, Deliverables, Analytics, Repos, Pipeline, Test Plan, and Artifacts. The main area displays a work item titled "47 As a user, I should be able to create playlists based on various categories (like mood, genre, artist, popularity, lyrics) as I need" by Karthick S. The work item is in the "Resolved" state. The description field is empty, with a placeholder "Click to add Description.". The acceptance criteria field is empty, with a placeholder "Click to add Acceptance Criteria.". The discussion field is empty, with a placeholder "Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.". The right sidebar shows the "Details" tab, which includes sections for Planning (Story Points 3, Priority 2, Risk), Classification (Value area Business), Deployment (To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting), Development (Add link, Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.), and Related Work (Add link, Parent, 26 Auto-Playlist Creation Based on user prefer..., Updated Feb 18, New, Tested By).

Result:

Thus, the creation of epics, features, user story and task has been created successfully.
